CLEANING SERVICE

**EXTERIOR & CLADDING CLEANING SPECIALISTS
COVERING THE SOUTH WEST AND WALES**

WHY CHOOSE US?

Working with virtually every industrial sector we offer a diverse cleaning service catered to the individual needs of our clients.

Our cleaning services are catered for the external cleaning of properties and facilities. At H2O virtually all our work comes from recommendations and we feel this is down to our ability to offer a competitive price coupled with a friendly, reliable service.

H2O Cleaning Services has invested in some of the most advanced pressure washing machinery on the market.

- ✓ Our pressure washing equipment is vastly superior to conventional domestic pressure washers, we use the correct equipment for the task at hand.
- ✓ A dirty building can have a damaging impact on a company's image , we help you make the best possible impression on visitors to your premises.
- ✓ H2O visit your site and inspect your site/building before commencing work. In doing this we are able to delivery accurate quotes and identify any issues which may occur.
- ✓ We are the people to call if you are near the end of a construction project and require a builders clean, Our post-construction cleaning service is available nationwide.
- ✓ Your project is in safe hands, we are fully insured and fully compliant with all HSE, CHAS premium accreditation, NEBOSH certification and IEMA environmental accreditation.

OUR SERVICES

QUALITY & DEDICATION

All customer requirements are different, so each customer receives individual attention so we can tailor our cleaning solutions to the specific requirements. Our aim is to achieve the desired objectives with minimum disruption and cost.

PRESSURE WASHING

We offer a professional pressure washing and sealing service for block paving, tarmac, concrete, pattern imprinted concrete, flagstones and natural stone. Our high pressure and sealing techniques enable us to restore tired old driveways, patios, car parks – in fact any hard landscaped surface for our clients.

SOFTWASHING

Softwashing is fast become the go-to choice when it comes to the cleaning of anything from rendered buildings, K-rend, roof tiles, tarmac, concrete, sports surfaces, decking and cladding. Our team remove, lichen, moss, algae, discolouration stains and any other organic matter you can think of.

CLADDING CLEANING

Cleaning the cladding on your building is part of a preventative maintenance program that will protect your investment. This can reduce ongoing maintenance costs, prevent costly replacement work and extend the lifespan of the building.

RENDER CLEANING

At H2O we specialise in the treating and cleaning of render and K-rend. Our staff are fully trained in the safe and effective cleaning of hard exterior surfaces.

Our render cleaning reputation is second to none. We have the equipment, expertise and experience.

ROOF CLEANING

Our roof cleaning team will completely clear and clean the roof of your residential or commercial building and will make sure they remove all moss, lichen and algae growth to restore your roof to it's original condition.

BLOCK CLEANING

We're specialists in exterior cleaning of both small & large residential blocks across the UK, from new-builds to conversions. We are trusted by numerous Block Management companies to keep the exterior of their property portfolios in pristine condition.

HOW WE WORK

At H2O we have van mounted hot and cold pressure washing set ups. All our jobs include a FREE site visit and inspection. We are fully insured and HSE Compliant.

Our experienced staff will work with your business on a 24 hour service to suit you and your customers.

All customer requirements are different, so each customer receives individual attention so we can tailor our cleaning solutions to the specific requirements. Our aim is to achieve the desired objectives with minimum disruption and cost.

ANY SURFACE, ANY BUDGET, WE CAN HELP

We offer a professional pressure washing and sealing service for block paving, tarmac, concrete, pattern imprinted concrete, flagstones and natural stone. Our high pressure and sealing techniques enable us to restore tired old driveways, patios, car parks – in fact any hard landscaped surface for our domestic and commercial clients.

TOP QUALITY EQUIPMENT

Our pressure washing equipment is vastly superior to conventional domestic pressure washers. Unlike domestic pressure washers, we can control the force and air flow so your surface can be cleaned safely without compromising the integrity of the material.

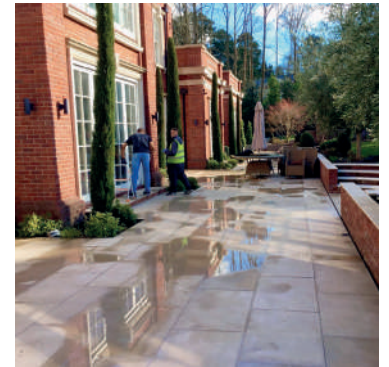

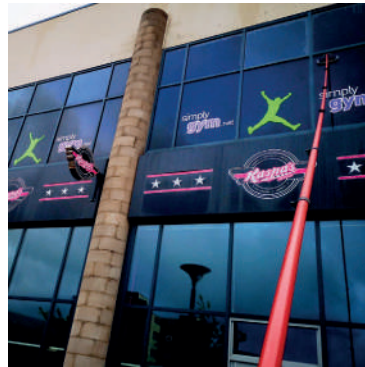

On block work, our machines are specially designed to remove the top layer of sand from the joints. This top layer of sand is the dirty contaminated sand where the vegetation grows from. After cleaning the joints are topped up with fresh kiln dried sand, which is sterile and will resist growth for a reasonable period of time. Our machines also have special tools and attachments which enables us to work quickly and efficiently with minimal collateral mess to the surroundings.

WHO WE WORK WITH

OUR HAPPY CLIENT REVIEW

A picture is worth a thousand words, but a few words followed by five stars always makes up smile. We can tell you how good we are, but these reviews from Google Reviews, Facebook and our website say it better we think.

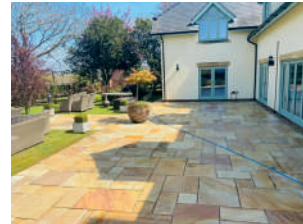

Had Wayne from H2O Exterior Cleaning clean my Patio, paths and front drive after we had building work completed. Have to say that the results were EXCEPTIONAL. This isn't just a few guys with a pressure washer, the results have to be seen to be believed! I can't rate them highly enough and VERY VERY reasonable too.

Wayne came to give me a quote on my mother's house to in hope carry out a render clean, due to years of built up grime it really needed it! Wayne gave us a quote and managed to fit it in relatively soon. The quality of the work done by him and his team was amazing great value for money! Would 100% recommend H2o cleaning service to anyone!

Superb high quality service. Wayne was polite and on time too. The price was reasonable and cost a lot less than if was going to do it myself. My render looked brand new after the clean. I can't recommend the company highly enough.

I was amazed at the results..!! its like having new slabs again...very, very good job done...would recommend these guys to anyone..! lovely and freindly and work super hard to get these results..! Thankyou so much....see you next year....!

I've recommended these guys to several of my customers and they have all been 100% satisfied. I wouldn't recommend just anyone to my customers if they weren't any good - simple as! Quality of work, getting the job done promptly, efficiently and to the highest of standards, no need to look elsewhere!

Very professional service. Didn't realise how grim our shop front was. H2O came and carried out a site visit and advised us of the best options. When they arrived on the day of the clean they did a great job, so many customers have commented, i highly recommend their services.
